Subject: Application for SMO – Diatomaceous Earth (DE) Deposit
Skull Valley, Utah – Map showing disturbance boundary

Dear Mr. Munson,

Tom Newman, Holnam Sr. Geologist, asked that I forward the attached map to you. It is an amendment to the SMO application submitted last week.

The map shows the locations of four-foot wooden laths that mark the edges of the area of disturbance for the diatomaceous earth. Each lath is identified with its latitude and longitude so that a GPS receiver can be used to locate them.

Should you have any questions, please advise.

Thank you for all your help.

Sincerely,

Connie Iverson
Holnam CAD Draftsperson

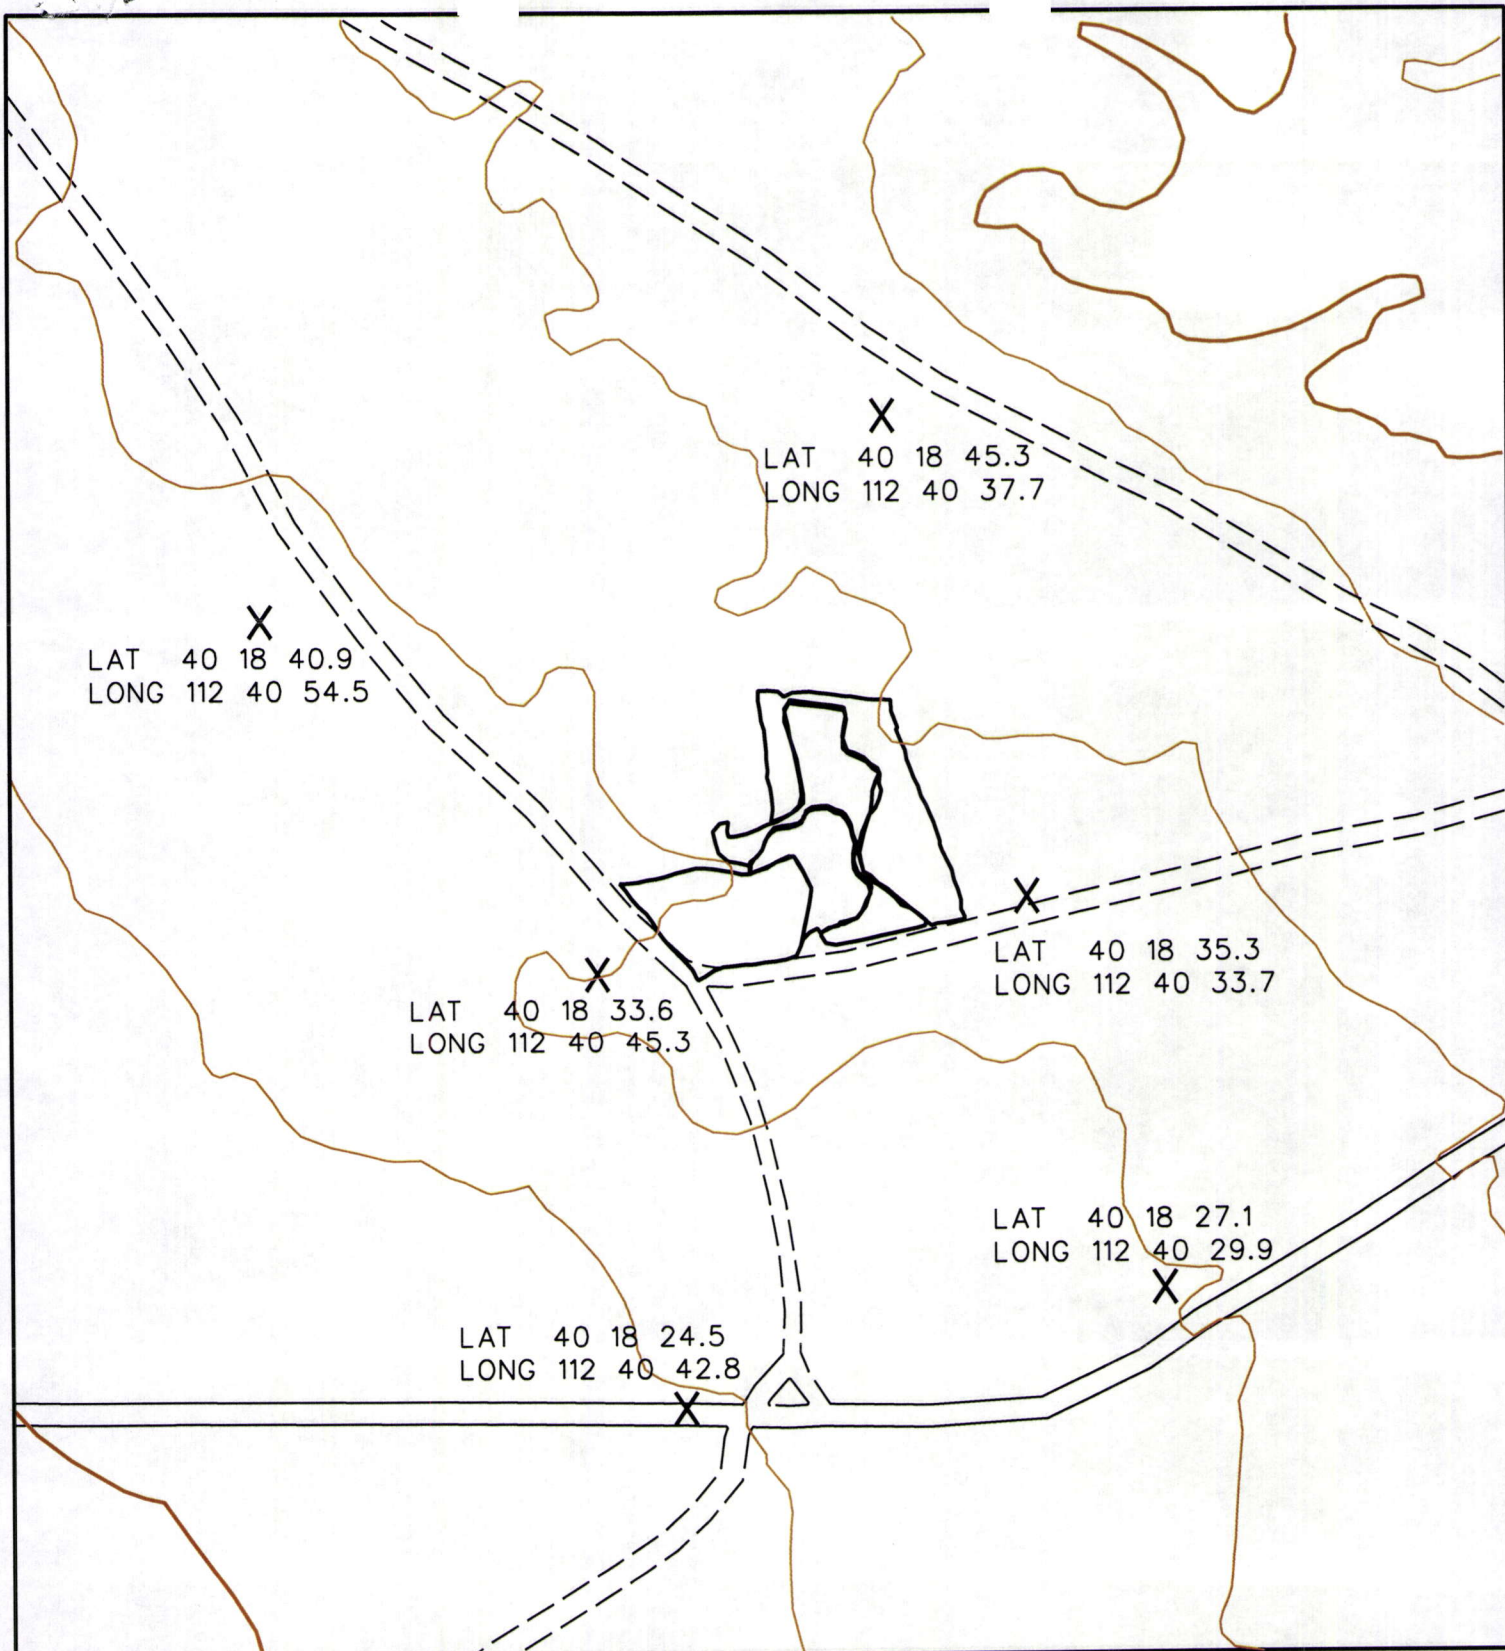

Attachment: Map of lath locations

CC: Tom Newman, Holnam Sr. Geologist
